# Subtopic 2: Pricing Strategy

## How Much Should You Charge?

### Your Rate Card

| Service         | Deliverable           | Starting Rate |
|-----------------|-----------------------|---------------|
| Instagram Reel  | 1 Reel                | ₹_____        |
| Story Set       | 3-frame Story         | ₹_____        |
| Carousel        | 1 Carousel            | ₹_____        |
| Reel + Stories  | 1 Reel + 3 Stories    | ₹_____        |
| UGC Video       | 1 edited video        | ₹_____        |
| Monthly Package | Multiple deliverables | ₹_____        |

Treat these as starting points. Your actual pricing should reflect your experience, audience, content quality, scope, and market.

### Basic Pricing Framework

### Usage Rights & Exclusivity

**Usage Rights**

Brands may want to reuse content on their site, ads, YouTube, or e-commerce. Additional usage = additional fee.

**Exclusivity**

If a brand asks you not to promote competitors for a period, that exclusivity window should be clearly defined and compensated.

# Negotiation Strategy

Don't be afraid to negotiate. When a brand's budget is lower than your rate, the answer isn't to immediately say yes or no — adjust the scope.

# How to Find Brand Deals & Outreach Scripts

Don't wait for brands to discover you. Proactively reach out to brands that genuinely fit your niche.

## Where to Find Brands

### Instagram & LinkedIn

Find brands in your niche and track their campaigns
